### **Short Bio/Remembrance:**

My dear friend [Gordon Propst](#), I will miss you so much. You were one of the few people in my life who just understood me from the moment we met. We met by chance, and it was a party from that moment on.

Life with Gordon wasn't just a party; it was a grand, messy Carnival, laughter bubbling over with adventure tucked around every corner. Traveling the world and adventure were his treasure troves. Gordon and I shared many adventures together in many countries and spent long nights discussing promising future escapades...

But the treasures Gordon collected weren't just graphic tee-shirts and trinkets on his adventures. The real treasures were the people and connections he made with them. He saw the sparkle in everyone's eyes, the potential friend where others saw just a face in the crowd. And wouldn't you know it, he was usually right. Many of the relationships that I value today are relationships that he helped build. His smile was like a magnet, drawing you in with its warmth and genuine interest.

Gordon's kindness and generosity were unsurpassed in this world. He was eternally optimistic and never complained about anything, even when he was going through the darkest of times. He found joy in the smallest of moments.

Although I don't drink anymore, I will sit with a margarita on the rocks and order one on occasion just for you.

Gordon was my family when I had none. He would always say, “I just love you so damn much, KID!” And I knew it was true. We shared a love that few people will ever know.

## Future Ideas: Create Pattern Library

Implement the concepts of Atomic Design to develop a pattern library. This will ensure consistency in design elements across the website.

### 1. Atoms:

Atoms are the basic building blocks of your design. These include things like colors, fonts, and simple UI elements.

Example Atoms:

Color Atom:

### EXAMPLES ONLY BELOW NOT TO BE USED AS LIVE CONTENT

Primary Color: #3366CC

Secondary Color: #66CC99

Accent Color: #FF9900

Typography Atom:

Heading Font: [Font Name], Size: 36px, Weight: Bold

Body Font: [Font Name], Size: 16px, Weight: Regular

## 2. Molecules:

Molecules are combinations of atoms that form simple UI components.

Example Molecules:

Button Molecule:

Primary Button: Background Color - #3366CC, Text Color - #FFFFFF

Secondary Button: Background Color - #66CC99, Text Color - #333333

Form Input Molecule:

Text Input: Border - 1px solid #333333, Padding - 8px

Submit Button: Background Color - #FF9900, Text Color - #FFFFFF

## 3. Organisms:

Organisms are more complex combinations of atoms and molecules that form distinct sections of a page.

Example Organisms:

Header Organism:

Navigation: Home, About, Hobbies

Footer Organism:

Copyright Text: © 2024 Your BioSite

Social Media Icons

#### 4. Templates:

Templates are arrangements of atoms, molecules, and organisms that form specific page layouts.

Example Templates:

Landing Page Template:

Header Organism

Hero Section (Image and Text)

Call-to-Action Button

About Page Template:

Header Organism

Biography Section (Text and Image)

5. Pages:

Pages are instances of templates filled with actual content.

Example Pages:
